

**Free**  
active loudspeaker

The first wireless multiroom audio system you can take with you when you move...

# A wonderfully simple and truly fantastic-sounding wireless digital audio solution

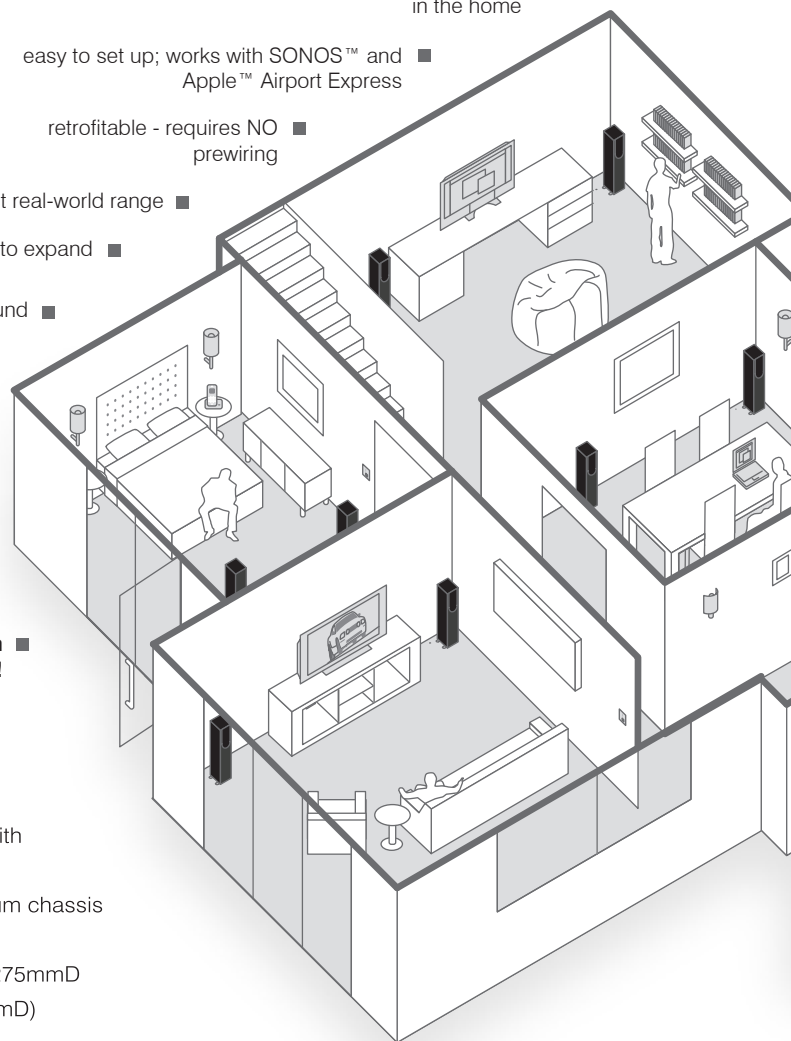

The **Free™** loudspeakers (FS-1) are floorstanding units available in luxurious satin white or satin black. Beautifully detailed with no visible connections on the cabinet. None. Not even on the back ...

All connections are recessed into the base (IEC mains/fuseholder, RJ45 network connection and audio input (phono) connections). Designed by **Free™** and manufactured by **PMC™**, each unit comprises of a custom-designed high-end 115/230V digital amplifier, advanced transmission line loudspeaker and space for a Wi-Fi unit concealed within the cabinet. They are designed for use with **SONOS™** ZP80s or **Apple™** Airport Express and **Apple™** TV. Excellent real-world wireless range is achieved between units, especially using the **SONOS™** ZP80 (mesh network) unit. The only requirement is power and a home network (with a live internet connection during set-up). The **SONOS™** option has an additional input (accessible in all rooms) per loudspeaker, to accommodate your client's record player, **iPod™**, sound from the TV, radio etc.

- stream your digital music anywhere in the home ■
- easy to set up; works with **SONOS™** and **Apple™** Airport Express ■
- retrofitable - requires NO prewiring ■
- excellent real-world range ■
- easy to expand ■
- audiophile-quality sound ■
- ATL™** technology gives clear realistic bass ■
- high-end switchable 115/230V digital amplifier ■
- no visible connections, not even on the back ■
- ... take your investment with you whenever you move! ■

27mm Twin Chamber fabric soft dome HF with high performance ferro cooling  
140mm Doped LF driver with cast magnesium chassis  
Steel feet with spikes  
Speaker (inc feet) - 910mmH x 215mmW x 275mmD (packaging - 1020mmH x 270mmW x 360mmD)  
15kg  
Satin Black / Satin White  
Internal direct phono connection to digital amplifier for wireless receiver  
Switched direct/wireless input into digital amplifier  
115/230V (switched), internal figure-8 power connection for wireless unit

**Free™** speakers require high speed internet access for **SONOS™** setups and a basic network connection in one place in the home (this doesn't need to be next to the speakers). **Free™** speakers contain a digital amplifier with audio input. Internal design allows for the concealed installation of **SONOS™** ZP80 or **Apple™** Airport Express for wireless connectivity. Recessed baseplate has phono connections for direct audio input and wireless audio output. Each speaker requires power and space underneath the unit for the transmission line to operate.
